Bibliography

Information technology — Vocabulary

Information processing systems — Open Systems Interconnection — Basic Reference Model — Part 2: Security Architecture

Information technology — Security techniques — Entity authentication — Part 1: General

Electronic document management — Design and operation of an information system for the preservation of electronic documents — Specifications

Information and documentation — Records management — Part 1: Concepts and principles

Information technology — Cloud computing — Overview and vocabulary

Information technology — Security techniques — Time-stamping services — Part 1: Framework

Electronic fee collection — Security framework

Information technology — Security techniques — Guidelines for identification, collection, acquisition and preservation of digital evidence

International Electrotechnical Vocabulary (IEV) — Part 192: Dependability
